

Galeo Keypad

Remote Electronics

Range : Digicode®

Galeo is a stylish and innovative keypad, combining good looks with a high level of ruggedness and vandal resistance.

Galeo is ideally suited for use internally or externally. Clever innovation has resulted in a keypad which can easily cope in the harshest of environments - and with the benefit of soft blue backlighting and a modern but uncompromising design, it truly is a keypad for all your coded entry solutions.

Galeo is supplied with a remote electronic controller - this means the electronics are housed in the secure area and therefore does not allow the possibility of gaining entry by "tampering" with the electronics within the keypad body.

To enhance Galeo's flexibility, the unit can have "free voltage" technology, which means any voltage between 12 and 48Vdc or 12 and 24Vac can be used. Additionally, there is the option of models with 2 or 3 relays to allow for additional switching or door/gate operation.

Technical specifications

- **Dimensions (L x W x D):**
110 x 75 x 15 mm
- **Visual and audible feedback**
- **Operating temperature:**
-25°C to +70°C
- **Operating voltage:**
 - 12V to 24VAC
 - 12V to 48VDC
- **Current consumption:**
30 to 100mA

Key feature

- **Backlit keypad**
- **Cast Aluminium body**
- **IP64**
- **1, 2 or 3 relay outputs**
- **Surface mount, shallow profile**
- **Free voltage**
- **Torx® mounting screws**
- **100 user codes**
